- Utilises passive high frequency 13.56 MHz technology
- Built-in choker, snap strap and zip ties included
- Lightweight and durable nylon construction
- Easily track inspections
- Control inventory and use
- Reliable information management
- Multiple system versions available

RFID retrofit tag for softgoods, 25-pack with integral choker strap, snap strap, and zip ties.

i-Safe™ is an intelligent safety system and the most advanced way to track safety equipment and manage your safety inspection program. It uses high frequency Radio Frequency Identification (RFID) to maximize the effectiveness and minimize the total cost of your safety program. i-Safe™ allows you to easily record and access information on inspections, inventory, use and tracks equipment assignments by worker or location. The system also automates the inspection process, with preloaded templates and other tracking information. There are multiple system options available — using a web portal or versions that can be stored on your own equipment or behind your own firewall. This allows for easy access and time-saving information management. In addition, mobile devices are supported for in-the-field, on-site inspections. Almost all new DBI-SALA® fall protection products are delivered from the factory already RFID-enabled. Retrofit tags are also available to outfit existing inventory and other safety equipment. Whether you're responsible for a single construction site, a manufacturing plant or a series of oil rigs, i-Safe™ makes it easier to manage your safety inspection program.

## Specifications

Brand	i-Safe™
Case Quantity	1
Color	Black
Dimensions	(2.70x2.00x0.30)in
iSafe Equipped	Yes
Product Series	i-Safe™
Product Type	Softgoods HF RFID Tag
Recommended Industry	Construction, General Industrial, Mining, Oil & Gas, Transportation, Utilities, Wind Energy
Weight	0.7 lb.
