TenActiv™

Cut-Resistant Composite Knit Glove with Composite Filament Fiber and Black Foam Nitrile Palms

#STAFGFNFB

#STAFGFNT

These cut-resistant gloves are part of Superior Glove's new product line: the TenActiv™ Series, featuring gloves knit with high-tenacity composite yarns that are designed to meet a range of applications, all at a great price.

A variety of composite-knit yarns go into this line, some featuring high-strength composite filament fiber in the blend for unbeatable cut resistance and dexterity. High-strength composite filament fiber is incorporated in a way that it cannot come through to the hand for total comfort and extended glove life. All TenActiv™ gloves feature lint-free, continuous filament yarn that is stronger than steel on an equal-weight basis.

This style features a black nitrile palm coat that is foamed to increase your grip in oil by displacing oils on surfaces. Nitrile withstands oils and solvents, making this style ideal for workers handling sharp, oily glass or metal.

Also available with a ¾ foam nitrile coating (#STAFGFNFB).
